

Inés Triviño

[GitHub](#) | [LinkedIn](#)

Software Engineer specializing in Digital Humanities. Experience with full-stack development, algorithms and data management.

Studies

Masters on Digital Humanities

Sep. 2026 - Jul. 2027 (estimation)

Universidad Complutense de Madrid

Madrid, Spain

- **Key areas:** Digital text analysis with a focus on AI, digital publishing and editing technologies, and management of professional projects.

Bachelor's Degree on Software Engineering

Sep. 2022 - Sep. 2026 (estimation)

Universidad Complutense de Madrid

Madrid, Spain

- 234/240 credits achieved as of 18.07.26, waiting on tribunal resolution for reception of the remaining 6 credits.
- **Bachelor's thesis:** Awarded with a **Honor's Mention**.
- **Key areas:** Advanced algorithms, development of web/mobile applications, management of relational and NoSQL databases, and methodologies for project management.

ERASMUS exchange

Sep. 2024 - Jun. 2025

Université Grenoble Alpes

Grenoble, France

- **Key areas:** Concurrent systems and cloud architecture, DevOps culture, automatisisation, and practical application of Agile methodologies.

Projects of interest

Statistics and Achievements Dashboard for AER | *React, Node.js, RabbitMQ, Docker*

Oct. 2025 - Jun. 2026

- Project awarded with a **Honor's Mention**.
- Design and development of a gamification system with XP points and achievements.
- Development of a backend system that manages submissions in real time.
- Usability tests and function tests (with Vitest).

EcoMóvil | *Node.js, Express.js, NPM*

Oct. 2025 - Jun. 2026

- Development of a full management dashboard.
- Implementation of session, administration, location, accesibility and notification functionalities.

TriviaBlast | *Java, Springboot, SQL*

Feb. 2026 - May. 2026

- Design and implementation of an interactive online game with points.
- Use of WebSockets and AJAX to manage the multiplayer game and automatic updates of the interface, including the online chat and the admin notifications.

lipu pi nimi sama | *HTML, CSS, JavaScript, GitHub*

Oct. 2025 - Nov. 2025

- Analysis of the phonology of the constructed language *Toki Pona*.
- Design and implementation of an optimized rhyming algorithm based on the phonetic patterns of the language.
- Full deployment of the static website on Github Pages along with a responsive interface design.

Leadership and Volunteering

Promoting scientific vocations | *UCM*

2025 - 2026

- Active participation in the university program destined to awake and incentivize vocations in engineering on high school students (2ºESO - 2º Bachillerato).
- Design and development of practical workshops on technology, translating complex software engineering concepts into accessible and motivating dynamics.

Skills

Programming languages:

Frameworks and Libraries:

Tools and Cloud:

Methodologies and Documentation:

Natural languages:

Java, C, C++, HTML5, CSS3, JavaScript, SQL, Python
React, Node.js, Bootstrap, JUnit, Springboot
Git, Docker, Maven, MySQL, MongoDB, VS Code
Agile methodology (SCRUM), LaTeX
Spanish (Native), English (C2), French (B2)
