Inés Triviño

GitHub | LinkedIn

Software Engineer specializing in NLP. Experienced in full-stack development, algorithmic analysis and data management.

Education

Masters Degree in Digital Humanities Sep. 2026 - Jul. 2027 (estimated)
Complutense University of Madrid *Madrid, Spain*

- **Key areas:** Analysis and processing of digital texts, digital edition and publishing technologies and professional project management.

Bachelors Degree in Software Engineering Sep. 2022 - Sep. 2026
Complutense University of Madrid *Madrid, Spain*

- **Thesis:** Awarded with an **Honors Distinction**.
- **Key areas:** Advanced algorithms, web and mobile app development, relational and NoSQL database management, and project management methodologies.

ERASMUS Exchange Sep. 2024 - Jun. 2025
Université Grenoble Alpes *Grenoble, France*

- **Key areas:** Concurrent systems and Cloud architecture, DevOps culture, automatization and practical applications of Agile methodologies.

Projects of Interest

AER Online Judge Stats & Achievements Panel | *React, Node, RabbitMQ, Docker* Oct. 2025 – Jun. 2026

- Project awarded an **Honors Distinction**.
- Design and development of a gamification system with XP points and achievements.
- Backend system that manages incoming submissions in real time.
- Usability and functional tests with Vitest.

EcoMóvil | *Node.js, Express.js, NPM* Oct. 2025 - Jun. 2026

- Development of a complex management system.
- Implemented session, administration, location, accessibility and notification functionalities.

TriviaBlast | *Java, Spring Boot, SQL* Feb. 2026 - May 2026

- Design and development of an interactive points-based game.
- Used WebSocket and AJAX manage multiplayer games and automatic updates on the UI, including an online chat and administrative notifications.

bonjour | *Go, Bash, GitHub Actions, Docker, GoReleaser* Aug. 2026 - Oct. 2026

- Creation of a CLI application with API calls using Golang.
- Efficient cache management for optimization and user configuration management across various operating systems.
- Deployment configured to run tests and create packages (binaries and Docker) automatically with GitHub Actions and Docker.

Leadership and Volunteering

Master's Degree Student Representative | *UCM* Sep. 2026 - Jul. 2027

- Participation in quality control meetings for the degree.
- Management of communications between students and the coordination team.

Encouraging Scientific Vocations | *UCM* April 2026

- Active participation in a University program to awaken and promote vocations in the areas of engineering in high school students (8th-12th grade).
- Designed and led practical workshops on technology, translating complex software problems into accessible and motivating dynamics.

Skills

Programming Languages	Python, Java, JavaScript, SQL
Additional Languages	Go, C, C++, HTML5, CSS3
Frameworks & Cloud	Node.js, React, Spring Boot, Docker, Git, Maven, MySQL, MongoDB, Neo4j
Others	LaTeX, Version Control, Scrum (Agile)
Natural Languages	Spanish (Native), English (C2), French (B2)
